Introduce your young naturalists to plants---their structure, propagation, classification, and more---with this engaging yearlong classical science curriculum. Influenced by Charlotte Mason and the living books philosophy, home schooling mother Jeannie Fulbright writes as if she were chatting with her own children, defining and explaining at their comprehension level. Designed to be used with both readers and non-readers, each clearly organized lesson features content-rich narration; note booking; and hands-on activities and projects using easy-to-find household items. Dissect seeds, force bulbs, make leaf skeletons---and take a close-up look at God's flora kingdom.
